## MethodRed Updates MIDIPlayer X v2.2

IRVINE, CA, January 23, 2017 – MethodRed's has updated MIDIPlayer X, their popular MIDI file player for the Mac. New v2.2 includes options to play all files currently loaded in succession and to repeat a single file.

MIDIPlayer X is a fast, easy way to play MIDI files on your Mac. It works with virtually all commercial MIDI hardware and software, and will play any MIDI file to your choice of available MIDI outputs, either hardware or software, or to its own built-in GM-compatible virtual synth.

"Thanks to the thousands who've found MIDIPlayer X useful, and especially those that reach out with questions, feature requests, and their positive reviews", says MethodRed founder Doug Hanson. "These latest features have been highly requested by our users, so we're excited to enhance the experience for those using MIDI files with MIDIPlayer X v2.2".

### What's New in Version 2.2

- Expanded AutoPlay to include auto-advance mode to play all loaded files in succession.
- Expanded AutoPlay with repeat mode to continuously repeat the selected file.

### Key Standard Features

- Plays any Standard MIDI File
- Works with your MIDI hardware and software
- Built-in GM-compatible synth
- Simple drag and drop operation

### Key Controls

- Rewind, fast forward, and jump to any timeline location
- Mute and Solo channels
- Tempo control
- Counter format
- Load multiple files and folders via drag and drop
- Save customized MIDI files
- Audio MIDI Setup shortcut

### System Requirements

MIDIPlayer X requires Mac OS X 10.9 Mavericks or later.

### Pricing & Availability

MIDIPlayer X v2.2 is a free upgrade for current owners.  
MIDIPlayer X is available in the Mac App Store for \$1.99.
